Check it, don't chance it. Don't leave safety to chance.
Quick, simple checks can prevent many childhood accidents.

Hidden hazards

Activity for parents and carers of toddlers and children under five

Young children are naturally curious but don't know what can hurt them. Even everyday objects can bring hidden dangers. And a moment's distraction can spell disaster.

So how can you stop your child from getting hurt? Check out your safety knowledge by completing our wordsearch. Find 10 hidden hazards around the home and garden.

Once you have completed the wordsearch, take a moment to think about how you can make your home more child-friendly.

Why not get down on your hands and knees to see your home from a toddler's point of view? Can you learn a new safety habit – for example, pushing your kettle to the back of your work surface or always running cold water into the bath before the hot? Or can you fit safety products like window locks, smoke alarms or safety gates?

For safety advice, send off for our free safety advice leaflets – see leaflet choices below. You can also visit our website at **www.capt.org.uk**
